And could swing a seytheall a summer day, And wake the meadows with song. I was hall fellow then with them all, And owned a cozy home,

But once I was young and strong,

When the harvest time was come. Twas Robin here, it was Robin there, And the days were clear and bright.

For my wife went on to that higher land Where God's glorious angels dwell, And I lost the touch of her chinging hand, And her kisses' loving spell.

With a crimson stain on his breast, And there by a lonely river's side, He sleeps in dreamless rest.

To the place where all must go.

For I grew weak, and stiff, and old, And my work kept getting small,

Save God's sunshine on the land.

But that is enough, for it tells that He, The merciful Father above. In young and old will no difference see. When He crowns them with His love.

which the Mainelander receives a bounty growth was small, it was eaten nearly off, from the Government. My onion sets and no worm was found. ### +40++ Gninen Grass.

There are three kinds of Guinea yards that were in about the lowest posgrasses in the Southern States, one of which is said to grow six or seven feet high in rich soil. It will grow well in any soil that is not too wet, even in poor pine land, but can hardly succeed in a fattitude above 30 degrees. The kind of Guinea grass that is cultivated in Florida is said to be wonderfully prolific. The editor of the Florida Agriculturist has editor of the Florida Agriculturist has said in his journal, and has repeated the of such stock in any way. The rearing, a first-class Jewelry, Clocks, Plated Ware, and all articles usually kept in a first-class Jewelry Store. statement to us in a private letter, that keeping, handling and marketing of such this grass will yield three or four cuttings, stock is disgraceful to all parties concerngrowing 150 years. Horned eattle are where he allows himself to produce or fond of both the hay and the grass. Even if the hay or the grass were much infe rior to most other hay and grasses, and if it were half as prolific as the Florida unusually large number of poor, thin rior to most other hay and grasses, and if it were half as prolific as the Florida people claim it to be, it must be valuable. We have never seen the Florida Guinea grass, but that which we have in Louisiand does not grow over three or four feet have anything to do with them. They have for be urged on the market, and this propagated from either seeds when sold bring very low irregular prices.

Season we have been getting here an unusually large number of poor, thin cows for this season of the year, so low and thin in flesh that no one wants to have never seen the Florida Guinea and thin in flesh that no one wants to have anything to do with them. They have anything to do with them. They have to be urged on the market, and when sold bring very low irregular prices.
